## In the Claims:

10	Elaim 1 (currently amended): A computer program product for enabling television ("TV")
	commerce to generate additional revenue streams, said program product embodied on computer
3/	readable media readable by one or more computing systems in an interactive television
4	environment having a connection to a computer network and comprising:
5	computer-readable program code means for initiating a TV commerce transaction
6	purchase by a consumer using said interactive television environment, wherein said transaction
7	pertains to an offering of a merchant;
8	computer readable program code means for gathering TV context information related to
9	said <del>purchase</del> transaction; and
10	computer-readable program code means for including said gathered context information in
11	a payment <u>protocol</u> message corresponding to said <del>purchase</del> <u>transaction</u> ;
12	computer-readable program code means for sending said payment protocol message to a
13	payment processor that processes payments for said merchant, to initiate said consumer's
14	payment to said merchant for said transaction;
15	computer-readable program code means for receiving said sent payment protocol message
16	at said payment processor; and
17	computer-readable program code means, responsive to said receiving, for automatically
18	allocating a portion of said consumer's payment to one or more TV originators identified by said
19	included context information and reducing an amount of said payment to be paid to said merchant
20	by said automatically allocated portion.

## Claims 2 - 6 (canceled)

RS	1
1	2

Claim 7 (currently amended): The computer program product according to Claim 6 1, wherein

said computer-readable program code means for automatically allocating using said included

context information further comprises:

4

5

6

7

8

3

computer-readable program code means for extracting an identification of each of said one

or more TV originators from said included context information; and

computer-readable program code means for determining said portion to be allocated using

allocating a predetermined percent percentage of said payment, for to each of said identified TV

originators.

1

Claim 8 (currently amended): The computer program product according to Claim 7 1, further

2 comp

comprising computer-readable program code means for sending said included context information

3

from said payment processor acquiring bank to at least one of said one or more identified TV

4 originators.

Claims 9 - 19 (canceled)

1

Claim 20 (currently amended): A system for enabling television ("TV") commerce to generate

2

additional revenue streams in an interactive television environment, said environment having a

3

connection to a computer network and said system comprising:

4

means for initiating a TV commerce purchase transaction by a consumer using said

5	interactive television environment, wherein said transaction pertains to an offering of a merchant;	
6	means for gathering TV context information related to said purchase transaction; and	
X	means for including said gathered context information in a payment protocol message	
8	corresponding to said purchase transaction;	
9	means for sending said payment protocol message to a payment processor that processes	
10	payments for said merchant, to initiate said consumer's payment to said merchant for said	
11	transaction;	
12	means for receiving said sent payment protocol message at said payment processor; and	
13	means, responsive to said receiving, for automatically allocating a portion of said	
14	consumer's payment to one or more TV originators identified by said included context	
15	information and reducing an amount of said payment to be paid to said merchant by said	
16	automatically allocated portion.	
	Claims 21 - 25 (canceled)	
1	Claim 26 (currently amended): The system according to Claim 25 20, wherein said means for	
2	automatically allocating using said included context information further comprises:	
3	means for extracting an identification of each of said one or more TV originators from	
4	said included context information; and	
5	means for determining said portion to be allocated using allocating a predetermined	
6	percent percentage of said payment, for to each of said identified TV originators.

1

2

3

Claim 45 (currently amended): The method according to Claim 44 39, wherein said step of automatically allocating using said included context information further comprises the steps of:

extracting an identification of each of said one or more TV originators from said included context information; and

determining said portion to be allocated using allocating a predetermined percent percentage of said payment, for to each of said identified TV originators.

Claim 46 (currently amended): The method according to Claim 45 39, further comprising the step of sending said included context information from said <u>payment processor</u> acquiring bank to at least one of said one or more identified TV priginators.

Claims 47 - 57 (canceled)

- Claim 58 (new): The method according to Claim 39, wherein said payment processor is an acquiring bank.
- Claim 59 (new): The method according to Claim 39, further comprising the step of sending said included context information from said payment processor to said merchant.
